

2016 COMPETITION NOTICE

DATE: March 23, 2016
DIVISION: Renegade – Asphalt
RE: 2016 Rules Addendum
SUBJ.: Clarifications

The following items in the 2016 Asphalt Renegade rulebook have been updated (1 page). Please contact Mike Bruno at (802) 236-9141 with questions.

10. IGNITION – ASPHALT (Clarification)

- MANDATORY IMMEDIATELY** – All 602 crate engines must use MSD Part # 87286 with a **6,200 rpm** rev chip, or MSD Part # 8727CT Ignition Box limited to **6,200 rpm**. Box and rev chip must remain operable and in working condition prior to, during, and after all racing events. Rev chip must face up and be securely fastened (taped in) in the “rev box”.
- MANDATORY IMMEDIATELY** – Rev box and coil must be mounted in engine compartment, under hood, out of reach of driver. Ground wire must be mounted to back of intake manifold. When hood is removed, rev box and all wires must be uncovered and clearly visible. (See diagram.)
